PROGRAM

AUGUST 3-28, 2020  
8:00-17:00

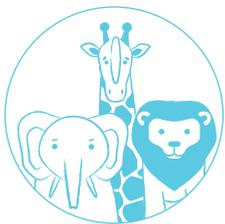

BASIS  
BEGINNERS  
PRAGUE

# SUMMER PROGRAM 2020

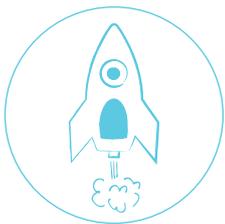

## WEEK 1 (AUGUST 3-7) | PIRATES

“Arrr” you ready to enter the world of pirates?! We will get to act, talk, dress and pretend play as pirates! Each child will get their pick of a popular pirate from stories and movies, such as Captain Hook, Jack Sparrow and Long John Silver. They will also be given props that fit their character such as a pirate hat, hook, eye patch, earring and bandana. Throughout the week they will get to learn more about their pirate characters through stories and movie clips as well as get to act out their characters aboard a pretend pirate ship.

## WEEK 2 (AUGUST 10-14) | ZOO ANIMALS

What is your favorite animal? We will learn about all kinds of animals that we can find at the Zoo. We will explore the different habitats such a safari, jungle, rainforest, desert and discuss which animal lives where. Together, we will read stories and use animal videos and pictures to further develop our understanding of the different animals—how they live and what they eat. We will also take a trip to the Prague Zoo to see the animals in person.

## WEEK 3 (AUGUST 17-21) | SPACE

3-2-1-Liftoff! We will blast off as astronauts on our fun filled adventure learning all about space. We will explore the sun, moon, planets and everything our galaxy has to offer. We will design our own rocket ship, take a virtual trip to the international space station, create our own planets and much more. This week will be filled with songs, dances, stories, as well as arts and crafts, all exploring the incredible outer space.

## WEEK 4 (AUGUST 24-28) | SCIENCE

Our week of all things Science is back! Come join us for some wacky experiments that will help teach the children about topics such as electricity, chemical reactions and friction in a totally fun and magical way. The children will get the chance to become scientists themselves through our science lab dramatic play. They will get to use scientific equipment, such as beakers, test tubes, goggles and lab coats to carry out their own pretend experiments.
